

Precision digital pressure gauge Model CPG1500

WIKA data sheet CT 10.51

For further approvals,
see page 7

Applications

- Oil and gas industry
- Maintenance and service facilities
- Calibration service companies and service industry
- Simple calibrations directly on-site
- Pressure test

Special features

- Measuring ranges between 0 ... 10,000 bar [0 ... 150,000 psi] and also vacuum and absolute pressure measuring ranges are available
- Accuracy: up to 0.025 % (incl. calibration certificate)
- Intrinsically safe version
- Logger function with up to 50 measured values per second
- Communication with WIKI-Cal software via Bluetooth®

Precision digital pressure gauge, model CPG1500

Description

The model CPG1500 precision digital pressure gauge adopts the concept of an analogue pressure gauge and at the same time works with the precision of a digital calibration instrument. The instrument thus combines the accuracy of digital measurement technology with the simplicity of an analogue measuring instrument and features impressive performance and ease of use.

The CPG1500 offers an accuracy of 0.1 % FS, 0.05 % FS or 0.025 % FS and is temperature-compensated in the range of -10 ... +50 °C [14 ... 122 °F]. Measurements can be displayed in any of 26 pressure and 5 level units, or in custom units to avoid intricate conversions.

The measuring rate can be user-defined to match the type of measurement required. Standard applications usually use three measured values per second. If required, this measuring rate can also be set to 50 measured values per second.

Via an energy-saving function, the CPG1500 switches automatically into "sleep" mode, in this mode the battery life can be increased up to 2,500 hours.

Through the innovative menu navigation, simple operation is ensured. The clear display, with integral bar graph display and large text area, assists with the effective analysis of the widest variety of measuring locations. With the Min./Max. function, the minimum and maximum pressures can be accessed immediately and saved automatically.

Software

WIKA-Cal calibration software is available for the CPG1500. WIKA-Cal also enables, over and above PC-supported calibration, the management of the calibration and instrument data in an SQL database.

As free software solutions for data transfer, WIKA also offers the WIKA-DCS PC software.

Specifications

Basic information		
Pressure types		
Gauge pressure	0 ... 10,000 bar [0 ... 150,000 psi]	
Absolute pressure	0 ... 0.25 bar abs. to 0 ... 40 bar abs. [0 ... 0.35 psi abs. to 0 ... 400 psi abs.]	
Vacuum and +/- measuring range	-0.25 ... +0.25 mbar to -1 ... 40 bar [-8 ... +8 psi to -14.5 ... 300 psi]	
Accuracy ^{1) 2)}	0.025 % FS 0.05 % FS 0.1 % FS 0.5 % FS → Also see table “Accuracy specifications”, page 3	
Connection location	Vertical mounting position, process connection lower mount	
Adjustment	Offset and span factor adjustable	
Functions		
Menu functions	Min./Max. alarm (visual) Power-off function Measuring rate Mean value filter Pressure rate Mean value (via adjustable interval) Level indication Tare offset Indication damping	
Memory	Min./Max. memory Integrated data logger	
Mean value interval	1 ... 300 seconds, adjustable	
Measuring rate	Max. 50/s	
Data logger ³⁾	Cyclic logger ⇒ Automatic recording of up to 1,000,000 values Cycle time ⇒ Selectable from 1 ... 3,600 s in 1-second steps ⇒ Selectable with the measuring rate in the following steps: 1/s, 3/s, 10/s and 50/s	
Battery status display	Symbol display with 4 bars indicates the battery status in 25 % steps.	
Case		
Rotatability	The case is rotatable by 330°.	
Dimensions	→ See dimensions in mm [in], page 10	
Ingress protection	IP65	
Weight	Incl. batteries	Approx. 680 g [1.5 lbs]
	With protective case cap	Approx. 820 g [1.81 lbs]

1) It is defined by the total measurement uncertainty, which is expressed with the coverage factor ($k = 2$) and includes the following factors: the intrinsic performance of the instrument, the measurement uncertainty of the reference instrument, long-term stability, influence of ambient conditions, drift and temperature effects over the compensated range during a periodic zero point adjustment.

2) FS = Full span = end of measuring range - start of measuring range

3) The WIKA-Cal software is required to evaluate the logger data
The logger data can be downloaded as a CSV file using the demo version of WIKA-Cal. You can use the live logger for an accurate data analysis or a direct generation of certificates by means of the logger template of the WIKA-Cal.

Digital display	
Display	
Display range	-199999 ... 199999 digits 5 ½-digit 7-segment display (incl. a large matrix area for auxiliary information)
Display resolution	4 ... 5 ½ digits; adjustable; depending on the selected pressure unit
Backlighting	Adjustable via key
Bar graph	0 ... 100 %, 20 individual segments, which show 5 % steps
Menu languages	Adjustable via menu
	■ English ■ German ■ Spanish ■ French ■ Italian ■ Russian ■ Polish
Pressure units	Adjustable via menu
	■ mbar ■ bar ■ psi ■ Pa ■ hPa ■ kPa ■ MPa ■ atm ■ Torr ■ mmHg ■ cmHg ■ inHg ■ inHg (0 °C) ■ inHg (60 °F) ■ mmH₂O ■ mH₂O ■ inH₂O ■ inH₂O (4 °C) ■ inH₂O (20 °C) ■ inH₂O (60 °F) ■ ftH₂O ■ kg/cm² ■ kp/cm² ■ lbf/ft² ■ kN/m² ■ micron
■ 3 x user-defined unit ¹⁾	

1) The user-defined units can only be set via the WIKA-Cal and WIKA-DCS software. The CPG1500 must be fitted with Bluetooth®.

Accuracy specifications		
Accuracy ^{1) 2)}		
Gauge pressure	■ 0.025 % FS ^{3) 4)} ■ 0.05 % FS ³⁾	1 ... 1,000 bar [15 ... 15,000 psi]
	0.1 % FS	1 ... 2,500 bar [15 ... 50,000 psi]
	0.5 % FS	4,000 ... 10,000 bar [60,000 ... 150,000 psi]
Absolute pressure	■ 0.025 % FS ^{3) 4)} ■ 0.05 % FS ³⁾ ■ 0.1 % FS	1 ... 40 bar abs. [15 ... 500 psi abs.]
Vacuum and +/- measuring range	■ 0.025 % FS ^{3) 4)} ■ 0.05 % FS ³⁾ ■ 0.1 % FS	-1 ... 0 bar to -1 ... 40 bar and -0.6 ... +0.6 bar [-14.5 ... 0 psi to -14.5 ... 300 psi, and -8 ... +8 psi]
Compensated range	-10 ... 50 °C [14 ... 122 °F]	
Reference conditions per IEC 61298-1 ⁵⁾		
Ambient temperature	15 ... 25 °C [59 ... 77 °F]	
Atmospheric pressure	860 ... 1,060 mbar [12.5 ... 15.4 psig]	
Humidity	< 95 % r. h. (non-condensing)	
Mounting position	Vertical mounting position, process connection facing downwards	
Calibration	Calibrated at 23 °C [74 °F] and in a vertical mounting position, process connection facing downwards	

1) It is defined by the total measurement uncertainty, which is expressed with the coverage factor (k = 2) and includes the following factors: the intrinsic performance of the instrument, the measurement uncertainty of the reference instrument, long-term stability, influence of ambient conditions, drift and temperature effects over the compensated range during a periodic zero point adjustment.

2) FS = Full span = end of measuring range - start of measuring range

3) At a measuring rate of ≤ 3 measured values per second

4) Only with ≥ 0 ... 1 bar up to ≤ 0 ... 1,000 bar (≥ 0 ... 15 psi up to ≤ 0 ... 14,500 psi), at reference conditions 23 °C ± 3 °C

Further details on: Process connection

Internal pressure transmission medium	Synthetic oil	With measuring ranges up to ≤ 25 bar [≤ 360 psi]
	Halocarbon oil	For oxygen version

1) Only possible for thread size G ½ B.

→ For drawings of process connections, see page 11

Radio standard

Bluetooth® 1)

Version	Bluetooth® Low Energy 4.0	
	Bluetooth® Classic 2.1	
Frequency range	2,400 ... 2,500 MHz	
HF output power	Max. 2 dBm (+ 2 dBi)	
Number of channels	Classic	79
	Low Energy	40
Channel spacing	Classic	1 MHz
	Low Energy	2 MHz
Bandwidth	1 or 2 MHz	
Max. transmission power	max. 4 dBm / 2.51 mW	

1) Requires a PC with at least Bluetooth® 2.1 interface.
Communication with iOS-enabled devices is supported up to and including iOS version 15.
Communication with Android-enabled mobile devices is supported up to and including Android version 11.

Voltage supply and performance data

Battery	3 x 1.5 V AA batteries 1)
Battery voltage	DC 4.95 V
Battery life	Typically 2,000 ... 2,500 h (without backlighting and with Bluetooth® not active)

1) The batteries included in the scope of delivery are approved for hazardous areas.
For hazardous areas, only approved models are permitted. These are listed separately in the operating instructions and in the additional operating instructions.

Operating conditions

Medium temperature range	-10 ... +50 °C [14 ... 122 °F] Lower temperature limit above the freezing point of the medium
Operating temperature	-10 ... +50 °C [14 ... 122 °F]
Storage temperature range	-20 ... +70 °C [-4 ... +158 °F]
Relative humidity, condensation	< 95 % r. h. (non-condensing)
Permissible media	All liquids and gases which are compatible with 316 stainless steel

WIKA-Cal calibration software

Easy and fast creation of a high-quality calibration certificate

The WIKA-Cal calibration software is used for generating calibration certificates or logger protocols for pressure measuring instruments and is available as a demo version for a cost-free download.

To switch from the demo version to a licenced version, a USB dongle with a valid licence must be purchased.

The preinstalled demo version changes automatically to the selected version when plugging in the USB dongle and remains available as long as the USB dongle is connected to the PC.

- The user is guided through the calibration or logger process
- Management of calibration data and instrument data
- Intelligent preselection via SQL database
- Menu languages: German, English, Italian, French, Dutch, Polish, Portuguese, Romanian, Spanish, Swedish, Russian, Greek, Japanese, Chinese
More languages are due with software updates
- Customer-specific complete solutions possible
- Maximum degree of automation in connection with our CPx series

The supported instruments are continuously expanded and even customer-specific adaptations are possible.

→ For further information, see data sheet CT 95.10

There are two licences available for WIKA-Cal in conjunction with a precision pressure measuring instrument of the CPx series

The WIKA-Cal calibration software is available both for reading the logger data stored in the precision digital pressure gauge as well as for online calibrations together with a PC. The scope of software functions depends on the selected licence. Several licences can be combined on one USB dongle.

Cal-Template (demo version)	Cal-Template (light version)	Log-Template (full version)
Fully automatic calibration	Semi-automatic calibration	■ Live measured value recording for a certain period of time with selectable interval, duration and start time ■ Readout of the integrated data logger of the precision digital pressure gauge ■ Creation of logger protocols with graphic and/or tabular representation of the measuring results in PDF format ■ Possibility of exporting measuring results as CSV file
Limitation to two measuring points	No limitation of the measuring points approached	
■ Creation of 3.1 inspection certificates per DIN EN 10204 ■ Calibration data can be exported to Excel® template or XML file ■ Calibration of pressure measuring instruments		
Ordering information for your enquiry for a single licence:		
Is available for a cost-free download	WIKA-CAL-LZ-Z-Z	WIKA-CAL-ZZ-L-Z
	WIKA-CAL-LZ-L-Z	

WIKA-DCS configuration software

As a supplement to the model CPG1200 and CPG1500 digital pressure gauges, in addition to the WIKA-Cal calibration software, the WIKA-DCS configuration software is also available.

With the help of the software, the instruments can be easily configured, either via the USB or Bluetooth® connection. The configuration includes, for example, setting the indication unit, displaying the temperature, min./max values and other menu settings.

The software also enables the configuration, control and storage of logger operations.

- Configuring the instrument
- Configuring logger sequences with the CPG1200/CPG1500
- Carrying out logger sequences with the CPG1200/CPG1500
- Downloading log files from the CPG1200/CPG1500
- Download the logger protocols as a CSV file
- Menu languages: German, English, French and Spanish

Minimum system requirements	
Processor	Intel® Pentium® 4 or AMD Athlon® 64
Software	■ Microsoft® Windows® XP with Service Pack 3 ■ Windows® 7 with Service Pack 1 ■ Windows® 8 ■ Windows® 10
Storage	1 GB RAM and 1 GB free hard disc space (no installation possible on portable flash storage media)
Display	1024 x 768 pixel screen resolution (1280 x 800 pixel recommended) with 16-bit colour depth and 256 MB VRAM

Complete test cases

The available test case is individually equipped according to your needs.

Case variants and existing recesses	Test case
Recesses for standard components	
Precision digital pressure gauge model CPG1500 or digital pressure gauge mode CPG1200	x
Sensor connection cable 1.1 m [3.3 ft]	x
Sealing set	x
Pneumatic hand test pump, model CPP10-H, CPP30 or CPP40	x
Hydraulic hand test pump, model CPP700-H or CPP1000-H	x
